

TR 55 Granulate Gun

Professional and industrial granulate gun with air pressure.

The TR 55 Granulate Gun is perfect for the application of Knot Filler granulate. The built in electronic temperature regulation allows the TR 55 Granulate Gun to work fast and precise. The temperature regulation keeps the temperature on a constant level, which makes the TR 55 gun perfect for temperature-sensitive fillers such as Knot Filler. The Knot Filler granulate is extruded through air pressure, which increases work speed and simplifies the exact dosing of Knot Filler. Finally, the large tank of 300 ml allows continuous work for a long period of time.

- Built in electronic temperature regulation
- Ready to work within 3 to 10 minutes.
- LCD Display = Easy and precise temperature adjustments - the user always knows the current temperature .
- Keeps the temperature on a constant level.
- Tank w. 330 ml capacity = Continuous work for a long time
- No o-rings in the system = No complex replacements thereof.

Technical data:

| | |
|--------------------------|---------------|
| Weight | 1.400 g |
| Power consumption | 600 Watt |
| Power supply | 230 V / 50 Hz |
| Degree of protection | IP 30 |
| Class of protection | I |
| Operating temperature | 50 - 210 °C |
| Operating pressure | 0,5 - 6 bar |
| Length of air tube | 5 m |
| Length of electric cord | 8,5 m |
| Length of connection kit | 3 m |
